

Education

New Horizons Computer Learning Center
Diploma, Full stack Web Development.
February 2022 - November, 2022

Ibadan, NG

Experience

AHAPN [ahapnng.org] Remote
April 2025 - Ongoing
Full stack Developer

- Engineered and deployed an event management system for the Association of Hospital and Administrative Pharmacists of Nigeria (AHAPN) on a VPS using Nginx and PM2 ensuring uptime and fault tolerance.
- Designed automated workflows for attendee registration, digital ID card generation and certificate issuance with Node.js, Express, Sendgrid and PDFKit making user experience seamless and serving 450+ concurrent users with high reliability.
- Achieved 100% faster on-boarding, eliminated manual errors and reduced event overhead costs.
- Conducted regular security audits and applied updates to safeguard sensitive user data, ensuring compliance with industry standard.

The Kaizen Brand [shop.kaizenbrand.shop] Remote
June 2023 - March 2025
Full stack Developer

- Built a responsive e-commerce platform with React & Tailwind, optimized for all devices.
- Developed Node.js/Express APIs for payments, notifications, and order tracking.
- Automated CI/CD pipelines, reducing deployment time by 40%.
- Integrated Paystack & Google Analytics for payments and insights.
- Developed modular and reusable UI components that reduced development time and improved load time by 50%
- Employed Jest and manual testing to ensure flawless feature deployment.

Travaye [travaye.ng] Remote
November 2022 - May 2023
Full stack Developer

- Collaborated with other developers to integrate back-end services, reducing page load times by 20% and improving user experience.
- Designed and deployed scalable RESTful APIs using Node.js and Express, supporting high-traffic response with minimal downtime.
- Created custom algorithms, reducing backend latency by 15% and boosting system reliability.
- Led new feature development, translating business needs into user-friendly interfaces.

Curator [curator-murex.vercel.app/login] Ibadan, NG
July 2022 - October 2022
Full stack Developer

- Built a responsive app with Next.js and React, optimizing user experience across devices.
- Integrated Firebase for secure audio file storage and metadata management.
- Wrote modules to extract and process audio metadata, enhancing media file management.
- Implemented encryption and authentication to ensure data security.
- Designed modular components, reducing development time and increasing consistency.

Projects

AHAPN Conference Platform

A production ready web app for managing AHAPN conference making registration, ID generation, participants certificates delivery seamless [<https://www.ahapnng.org/>]

The Kaizen Brand E-commerce Platform

An e-commerce platform with payment, analytics, and automated deployment. Optimized for mobile and desktop. [<https://shop.kaizenbrand.shop>]

Skills & Interests

Technical: AWS(CDK, EC2, ECS, Lambda, SQS, SNS, S3, Cloudfront, CloudWatch), GCP, N8N, Grafana, Nestjs, Typescript, Javascript, Expressjs, Nextjs, Reactjs, Tailwind, Python, Laravel, Flask, Django, Github, Netlify, Vercel, Nginx, Jest, Postman, Docker, MongoDB, Postgres, Jest, Prisma, Wordpress, Pm2, Bash.
