Education

Babcock University

Ilishan

Remo, NG

Bachelor's Degree, Computer Science. GPA [4.40/5.00]

August 2020 - July, 2023

Experience

Odin Cloud [odincloud.ai]

Remote

Backend Developer

May 2025 –

Ongoing

- Architected and deployed a multi-tenant SaaS platform using AWS CDK (Cloud Development Kit).
- Built a fully serverless, event-driven backend on AWS (Lambda, API Gateway, DynamoDB, S3, Cognito, SQS, SNS, EC2) ensuring horizontal scalability and high availability.
- Implemented CI/CD pipelines via GitHub Actions and AWS CodeBuild, enabling zero-downtime blue-green deployments.
- Automated monitoring and tracing with CloudWatch and Grafana, cutting mean-time-to-detect by 60%.
- Mentored two junior developers and led knowledge-sharing sessions on cloud-native best practices.
-

Educify [educify.org]

Remote

Backend Developer

August 2024 –

April 2025

- Re-architected backend services with Express.js and Prisma, improving response times by ~45%.
- Designed RESTful APIs serving 1K+ monthly active users, with <200ms average response time.
- Implemented Redis-based caching layer, reducing DB query volume by ~60% under load.
- Led CI/CD implementation with GitHub Actions, achieving zero-downtime deploys and faster releases.
- Hardened endpoints with JWT-based auth and role-based access control (RBAC), enhancing API security.

Federal Mortgage Bank of Nigeria [fmbn.gov.ng]

Abuja, NG

Software Engineer

December 2023 –

December 2024

- Designed and built internal tooling that automated legacy workflows, reducing processing time by 50%.
- Migrated legacy monolith to modular architecture using Node.js and PostgreSQL, improving maintainability and uptime.
- Introduced CI/CD pipelines and pre-deployment checks, which cut QA feedback loops by 50%.
- Analyzed legacy code and modularized it, resulting in a 30% reduction in critical bugs.

Connect [useconnect.app]

Remote

Fullstack Developer

May 2022 –

October 2023

- Co-led development of a robust event ticketing platform handling huge numbers of transactions monthly.
- Built scalable APIs, implemented caching and SSR for a blazing-fast frontend experience.
- Integrated secure payment flows and real-time notifications using modern web sockets and microservices.
- Spearheaded DevOps adoption: Dockerized the app, implemented GitHub Actions, and streamlined deployments to Vercel and Netlify.

Projects

Connect Ticketing Web App

Connect is a scalable event ticketing platform that enables users to effortlessly create, sell, and purchase event tickets while ensuring a seamless and secure transaction experience. [Link](#)

Educify E-learning Platform

A modern educational platform with dynamic course delivery, instructor dashboards, and personalized learning paths. Built with **Next.js**, optimized for mobile and desktop. [Link](#)

Skills & Interests

Technical: AWS(CDK, EC2, ECS, Lambda, SQS, SNS, S3, Cloudfront, CloudWatch), GCP, N8N, Grafana, Nestjs, Typescript, Javascript, Expressjs, Nextjs, Reactjs, Tailwind, Python, Laravel, Flask, Django, Github, Netlify, Vercel, Nginx, Jest, Postman, Docker, MongoDB, Postgres, Jest, Prisma, Wordpress.
